

SURGICAL INFORMATION FORM

PLEASE READ CAREFULLY.

Anesthetic Procedures & Risks

We use a combination of pre-anesthetic medications/injectable and/or inhalant anesthetics to achieve optimum levels of anesthesia that are safe for your pet.

Pre-op Sedation-Is given for especially high strung and nervous patients.

For most procedures, your pet is anesthetized and then intubated (insertion of a tube into the trachea or wind pipe). This will ensure that your pet is able to receive oxygen at all times and prevents aspiration of any fluids into the lungs. Anesthesia is maintained with a gas anesthetic called Isoflurane. This gas is safe and is metabolized by the lungs, not the kidneys or liver.

Monitoring & Pain Management-Monitoring of patients during anesthesia is done in two ways. First, a veterinary technician is with your pet continuously from beginning of anesthesia to recovery. Second, we have a monitor that records heart rate, pulse rate and oxygen levels. We also monitor breathing and temperature throughout procedure.

Our hospital strongly believes in compassionate, quality, medical care for our patients. As a result, all surgery patients will receive pain management before, during and after surgery. Additional information will be given at discharge. We hope this program will reduce any discomfort experienced and aid in a quick recovery.

Potential Surgical Complications

1. Canine and Feline Spay

1. Bleeding
2. Infection
3. Recurrent Heat (very rare)
4. Urinary Incontinence
5. Weight Gain
6. Suture Reactions

2. Canine and Feline Castration

1. Bleeding
2. Infection
3. Testicular Swelling
4. Suture Reactions (Canine only)

3. Feline Declaw

1. Bleeding
2. Infection
3. Limping/Lameness
4. Regrowth of Nail

4. Tumor/Lump Removal

1. Bleeding
2. Infection
3. Swelling and Drainage
4. Suture Reaction

5. Dentistry

1. Bleeding
2. Infection of extracted tooth site

6. ACL Repair

1. Bleeding
2. Infection
3. Swelling and Drainage
4. Suture Reaction
5. Breakdown of Repair

It is important for you to understand that there is always a risk of anesthetic and surgical complications anytime these procedures are performed. We strive to take the highest quality care of your pet and take all the added precautions you allow to avoid potential complications.

Thank you for entrusting your pet to us.
